GETPOWERPAD™ unveils Qi charger at CEATEC, Tokyo **Called the GETPOWERPAD™ Qi 1**

Amsterdam, NL - Bright Business Group (BBG) today announced the GETPOWERPAD™ Qi 1, a single wireless charger, with outstanding design and high compatibility as core features. The GETPOWERPAD™ Qi 1 is Qi compatible, according to the standard set by the Wireless Power Consortium (WPC).

GETPOWERPAD™ was one of the first companies to join the Wireless Power Consortium, back in 2009. GETPOWERPAD™ believes that a universal standard is absolutely necessary for the wireless charging industry to succeed. Co-founder Robin Nagelmaeker said: "The Wireless Power Consortium was and still is the most promising standard and the most likely to succeed!"

The GETPOWERPAD™ Qi 1 will be available by the end of this year. A select network of innovators, trend watchers, artists, trendsetters, bloggers, role models, some crazy pot smokers and a few John Do's are now evaluating the GETPOWERPAD™ Qi 1. They will make sure that the GETPOWERPAD™ Qi 1 is the hottest wireless charger to rock the market and of course you will love it!

At the upcoming CEATEC show in Japan, the WPC will have its own booth demonstrating over 60 products, including the GETPOWERPAD™ Qi 1. The exhibition will be held at Makuhari Messe from October 4 to October 8. We invite you to visit the WPC in Hall 3, Booth 3A65.

Key features of GETPOWERPAD™ Qi 1 include:

- Outstanding design, the hottest replacement for your cables
- Qi compatible, charge wirelessly with or without receiver
- iPhone 5 compatible
- Portable size 90 x 150 x 14,8 mm
- Ultra light 110 gram
- LED indicator activates when charging
- Sound indicator tells you the connection has been made
- Magnetic attraction between the receiver and access point
